1. Introduction

The website we have chosen is "police.lk". The purpose of choosing this website was to resolve any issues with the user interfaces. When there are interfaces problems the user does not understand its benefits and it is difficult for the user to use such a website. So, all the members of our group came together and looked for the flaws in the user interfaces of the "police.lk" website, fixed them and redesigned them. Here is the user interface we created to fix those issues.

2. Methodology

The web-based application, which was developed for the Sri Lanka Police named "www.police.lk" was selected to perform a new look and simply provide greater convenience to the users. In this project, the web-based application was developed for the Sri Lanka Police to facilitate high-fidelity prototypes that look like live software to customers, which means users would be more likely to behave naturally and users friendly.

Data Analysis is one of the important activities that should be followed after the web application elicitation. For this project, in-depth interviews with contextual inquiries and video transcripts were used as data collection methods. Contextual inquiries are personal and unstructured interviews whose aim is to identify participant's emotions, feelings, and opinions regarding usability issues in the interfaces of the selected web application. As far as data collection tools were concerned, the conduction of the project involved the use of a semi-structured questionnaire, which was used as contextual inquiries and video transcripts to guide for the project.

For this project, Sketching is one of the important activities that should be followed before design high fidelity prototype for selected interfaces of the web application. Sketching is a technique mainly used by designers for web and graphic design projects. Figma prototyping tool were used to design high fidelity prototypes for selected interfaces of the web application. Figma is a vector graphics editor and prototyping tool for design high fidelity prototypes.

❖ Analysis Part

1) IT19033938

Prototype screen/ UI	User's feedback/ problem	Reason for negative feedback	Severity(hi gh/medium /low) and justification	Way(s) to rectify and tradeoffs	Pros	Cons
Home page	The information is not enough.	Lack of adequate information regarding the given fact.	medium	Increase the information as user friendly.	1.Well planned information architecture. 2. Good color scheme. 3. Good first impression. 4. effective navigation.	1.Low readability with information is not enough.
Special events	User satisfied	---	---	---	1.Well planned information architecture. 2. High Readability. 3. Good color scheme. 4. High aesthetic appeal. 5. Good first impression.	---
Police Library	The font size is small.	It is difficult to read the required information.	medium	Increase the font size as user friendly.	1.well planned information architecture. 2. Good first impression. 3. effective navigation.	1.Low Readability with small font size.

2) IT19035536

Prototype screen/ UI	User's feedback/ problem	Reason for negative feedback	Severity(hi gh/medium /low) and justification	Way(s) to rectify and tradeoffs	Pros	Cons
Media Briefing	User Friendly	---	---	---	1.Usable form 2. effective 3. easy to understand. 4.well planned	---
Examination	Font color is not enough	The information is difficult to read.	medium	Increase the font color as use satisfy.	1.Usable form 2. effective 3. easy to understand. 4.well planned ui.	1. Low Readability with font color.
Human right	The user does not understand the information given in the paragraph.	It takes time to understand that information.	medium	Summarize the content.	1.Usable form 2.Good first impression 3. effective 4. easy to understand. 5.well planned	1.Low Readability with paragraph content.

3) IT19171302

Prototype screen/ UI	User's feedback/ problem	Reason for negative feedback	Severity (high/medi um/low) and justification	Way(s) to rectify and tradeoffs	Pros	Cons
Police History	The color of the font is insufficient.	It is hard to read the information.	Medium	Increase the font color as use satisfy.	1. Easy to understand 2. Well planned. 3. effective 4. Effective scroll bar navigation.	Low Readability with font color.
Notable Service	The information is insufficient.	There is insufficient information about the given fact.	Medium	Increase the amount of information that is user- friendly.	1. Including well information architecture 2. Easy to understand 3. A good, beautiful color palette. 4. effective	It is not enough to have low readability with information.

CCTV Division	User satisfied	--	--	--	1. Color scheme is excellent. 2. Easy to Understand 3. Well planned information architecture. 4. Exceptional aesthetic appeal.	.--
---------------	----------------	----	----	----	---	-----

4) IT19031408

Prototype screen/ UI	User's feedback/ problem	Reason for negative feedback	Severity(hi gh/medium /low) and justification	Way(s) to rectify and tradeoffs	Pros	Cons
Sports News	The information is not enough.	Lack of adequate information regarding the given fact.	medium	Increase the information as user friendly.	1.Well planned information architecture. 2. Good color scheme. 3. Good first impression. 4. effective navigation.	1.Low readability with information is not enough.
Vision mission page	User satisfied	---	---	---	1.Well planned information architecture. 2. High Readability. 3. Good color scheme. 4. High aesthetic appeal. 5. Good first impression.	---
Police college	The font size is small.	It is difficult to read the required information.	medium	Increase the font size as user friendly.	1.well planned information architecture. 2. Good first impression. 3. Usable form. 4. effective navigation.	1.Low Readability with small font size.

5) IT19037066

Prototype screen / UI	User's feedback /Problem	Reason for negative feedback	Severity (high/ medium/ low) and justification.	Way(s) to rectify and any tradeoffs	Pros	Cons
Media Release	A visually appealing interface	-	-	-	The user decreases search time and increases satisfaction	-
Police sports club	Clean layout	-	-	-	Increased user engagement and retention	-
Traffic Police	Not enough information	Poor and incomplete data collection regarding the traffic police	Medium	Provide in-depth information as a visually appealing interface	-	Decreased user engagement

Shenal	Navigate to the Media Release Page	What do you think about the arrangement of the media releases?	What do you think about finding the information of the media releases?	-
Thimira	Navigate to the Police Sports Club Page	What do you think about the font size of the Police Sports Club Page?	What do you think about the overall design/layout of the page?	-
Hashini	Navigate to the Traffic Police Page	What do you think about the providing traffic police information?	Can you find information quickly?	Participant struggling with finding information

4. Summery

What we did in this project was to change the user interfaces of the police.lk website in a human friendly manner. We have also changed the user interfaces so that the users can easily get the service they want. We use user friendly colors throughout this web site. Also used cruds for User interfaces to make it easier for the user (Ex. insert, update, delete, view). We designed this user interfaces to make it easy to find any information user need quickly from the "police.lk" website according to the user's needs.

5. Future work

New technologies, new methods, and new ideas have brought significant change to law enforcement. Police and law enforcement agencies across the country are driving the change, pioneering creative ideas, adapting to changing contexts, and incorporating insights from officers and community partners. The innovations that are shaping the future of law enforcement begin with emerging technologies that support new concepts of operations, enabling the interventions and relationships that keep society safe.

The next century of policing

Keeping society secure is the goal of law enforcement. As a result, it is unsurprising that law enforcement has evolved along with society. The profession has undergone significant transformation due to new technologies, methodologies, and concepts. At its foundation, however, law enforcement demands the same commitment to communities, sense of duty and sacrifice, and integrity that it has always required.

Technology is moving at a faster rate than it has ever been before. Every day, it seems, new devices and services arrive. With just a phone, we can now order anything from groceries to software to a ride from a complete stranger. In a moment, we can communicate with anyone, including millions of people.

Our ability to learn and do well, as well as the ability of some to damage others, is stronger than it has ever been. Technology is transforming fundamental aspects of how we interact as a community, and as society evolves, so will the tools, strategies, and concepts that law enforcement officers utilize to keep us safe.

Innovation in law enforcement

It's not just about the latest technology when it comes to innovation; it's about finding new methods to do things better. New concepts, methods, and tools are all examples of innovations. However, innovation works best when all of these elements are combined to give police and law enforcement organizations more information and influence than ever before. Emerging technology that support new notions of operations, enabling interventions, and connections that keep society safe are at the heart of the innovations that are influencing the future of law enforcement.

Across the country, police and law enforcement agencies are leading the charge, trying out new ideas, reacting to changing circumstances, and incorporating feedback from officers and community partners. To comprehend how these unique techniques may change the future, we must first comprehend an officer's journey from evidence to insight. Officers must be able to quickly assess their surroundings, use technology to promote public safety, mine data for ideas about what to do next, scale up their accomplishments, and become actively involved in their communities.

The top four innovations that will shape the future

1) Distributed sensing and virtual patrols

Combining emerging technologies to gain greater awareness, faster

Smart sensors can be used to compile a variety of data to assist police in performing their duties more quickly and effectively. Locations can be logged, gunshots can be heard, video can be streamed, license plates can be flagged, databases can be scanned, and virtual patrols may be conducted, giving cops unprecedented awareness of their surroundings.

These capabilities can supply the raw data that can be used by more thorough analytics to improve efficiencies and speed up investigations. Most importantly, these technologies can assist officers in arriving at the correct location at the appropriate time.

2) Technology as a field collaborator

Digital technologies are being used to increase officer and citizen safety.

The Internet of Things (IoT) and distributed sensing are both about using new technology to gather information about the world and lead people in the proper path. But, what should officers do when they arrive on the scene? New technologies and techniques are emerging that can aid in the direction of global and Sri Lankan activity. People can now see, hear, and act in previously unimaginable ways because to advancements in fields like 5G connectivity, electronics downsizing, and augmented reality.

For example, an officer arriving at a new location can now utilize augmented reality glasses to discover vital information about previous requests for service from this address, locate building exits, and view the neighborhood's recent crime history. An officer could use this information to take precautions to protect themselves and better serve the public.

3) Predictive policing and artificial intelligence

Using massive amounts of data to prevent crime

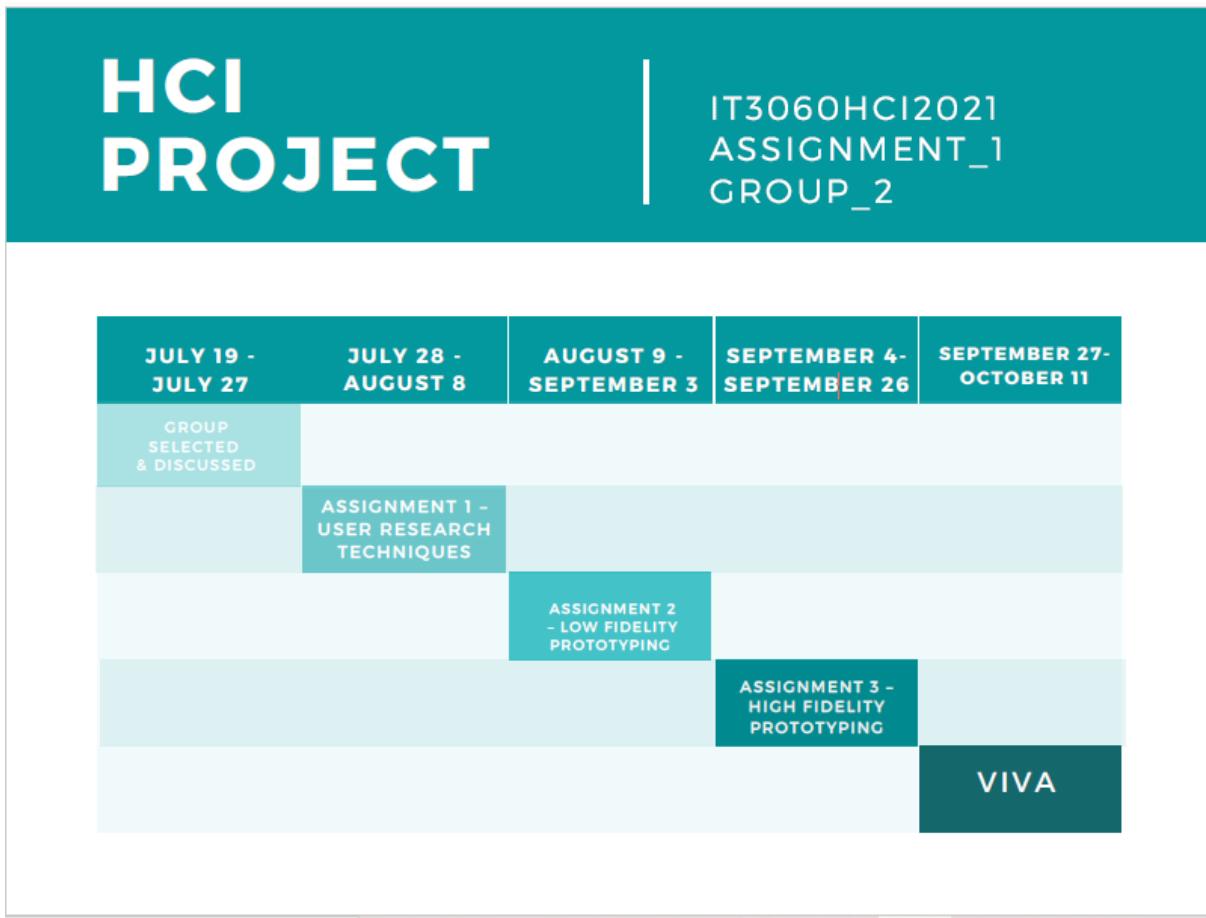

Artificial intelligence (AI) and machine learning will be critical in future investigations to acquire true understanding. AI might help law enforcement discover vital locations to be, find key links between suspects, and explore other insights hidden in a sea of data by evaluating patterns, sensor feeds, and databases of information.

4) new forms of community participation

To improve public safety, stronger local networks are being formed.

The protection of the community is the objective of law enforcement, and a solid relationship with the community is important to the success of any law enforcement agency. Building strong community ties requires not only traditional police outreach and local involvement, but also the use of technology to allow people convey their needs and risks directly. By allowing officers to be more aware of and responsive to their constituents' demands, new technology can assist police strengthen their links to the community.

6. Time schedule (Gantt chart)

2) IT19035536

The screenshot shows the Sri Lanka Police website's homepage. At the top, there is a banner featuring several police officers in uniform wearing face masks. The text "Welcome to Srilanka Police" is overlaid on the banner. Below the banner, the text "Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none – equity to all." is displayed. The main content area has a light blue background. It features a section titled "Human Rights" in large green text, followed by "Tasks carry out by the Human Right Division" in red text. A bulleted list of tasks is provided. To the right, there is a sidebar with sections for "Mission", "Vision", and "History". The "Mission" section states: "For a people friendly, professional, prestigious Police Service". The "Vision" section states: "To diminish human rights violations committed by Police officers". The "History" section provides a brief history of the Police Human Rights Division's establishment.

Human Rights

Tasks carry out by the Human Right Division

- Educate the police officers regarding the protection of human rights.
- Coordination of human rights affairs with the Human Rights Commission and Inter ministerial human rights groups.
- Bring forward necessary reports through Inspector General of Police with regard to the inquiries Made about the disappearances and abductions of people reported to the International Human Rights Council Geneva
- Register information about the human rights cases filed against Police Officers and the Human right contraventions of Police officers
- Conduct awareness programs about human rights for the general public via Police stations and register them.
- Distribution of forms delivered to the relatives of arrested personnel to all Police divisions after obtaining them from the Ministry of Defence
- Preparation and Delivery of reports to the Inspector General Of Police which are necessitate by the
- Government officials who participate to the discussions arranged by the International Human rights Council with regard to the complaints lodged by Hon Member of Parliaments

Year plan

- Actions were taken to conduct workshops and seminars to educate Police officers about the Human rights subject on divisional and district levels. Seminars were conducted on previous years with the aid of PAFFREL together with the assistance of Attorney General's Department and willing to conduct workshops in the year 2011 too
- Propose to educate newly recruited officers about human right subject through scholars, with in their training time period at the Police Collage.

The screenshot shows the official website of the Sri Lanka Police. At the top, there is a banner featuring several police officers in uniform, some wearing face masks. Below the banner, the text "Welcome to Sri Lanka Police" is displayed, followed by a quote about the police's commitment to upholding the law and maintaining public order. The main content area is divided into several sections: "History", "Vision", "Mission", "Responsibility", and "The role and responsibilities of the CCTV Division". Each section contains descriptive text and small images related to its purpose. A "Contact Us" section at the bottom provides contact information for various divisions, including General, Emergency, Deputy Inspector General of Police (Information Technology & CCTV), ASP (CCTV), OIC (CCTV), and an email address. The footer includes links to find nearest police stations, social media icons, related links, and a "Get Help" section with emergency contact numbers.

Welcome to Sri Lanka Police

Sri Lanka Police is committed and confident to uphold and enforce the laws of the land, to preserve the public order, prevent crime and terrorism with prejudice to none – equity to all.

History

By the year 2005, LTTE terrorists were operating even in SL Government controlled areas causing Civilian Communal tension, Economic and Public Key Points disrupting Civilians lives and creating a general psychosis among the public, restricting the free movement and the day to day business of the public and also disrupting the schooling of children in many cities of the country with suicide bomb attacks and at times with military like operations against key government and economic installations.

Public was hesitant to travel on public roads and visit Govt offices for fear of these attacks, while terrorists operated in the cities and its suburbs with its well planted operators who mostly infiltrated the society during the previous "Peace Accord" and downing thereof all the security check points in and around cities in the country.

Terrorists even obtained lists of possible informants against them and went on a spree of a manhunt to track down and destroy all these informants, thereby leaving no other option for the government or the Police but to check, search, and arrest all possible suspected terrorist activists and detain them for thorough screening.

Humanitarian operations were successfully concluded by mid March, 2009 for release of hostage civilians in the North and the East of the island by the Security Forces.

Vision

Hi-Tech approach with surveillance cameras (24X7) to enhance capacity of civilian policing

Mission

Co-ordination with all security authorities to update them with on-line findings at it zero time for quick response.

Responsibility

Although the Terrorists and its network operating within the Island were totally annihilated, some parasitic elements preying on civilians also were in the Island, who prospered by occupying the vacuum left by the terrorists in scenario created by them still remained in the society, mainly operating in the cities, especially in Colombo in the form of organized criminal gangs. They resort to armed robbery, dealing in narcotics, human trafficking, and mainly, extortion, blackmail, and generally disrupt the peaceful existence of the civilian population.

The need has arisen to check for offensive weapons abundant in the country after a long period of terrorist activities and this necessitates random body, baggage and vehicle searches, thereby intruding on the privacy of the innocent public. Remote observation of public places will obviate or reduce need for such operations, enhancing safeguarding of privacy of the public.

Thence the requirement for building security in the community with minimal intrusion into the privacy of the public after the humanitarian operations emerged as a priority requirement of the society.

With a view to this, the Secretary Defense, Mr. Gotabaya Rajapaksa declared open the Sri Lanka Police Closed Circuit Television Cameras System (CCTV) on December 21, 2010. This Division of the Police operates under a Senior Deputy Inspector General of Police and a Deputy Inspector General of Police.

The role and responsibilities of the CCTV Division

1. Obtaining live video Surveillance Images.
2. Aiding in Traffic Detection and Management.
3. Aiding in Public Security Safety—to propagate the Colombo city as the safest and secure place.
4. Aiding in Crime detection prevention & Inquiries
 - To provide immediate support to help ensure an effective and immediate Police response in any emergency situations.
 - Prevent and reduce crime.
 - Reduce public fear of crime.
 - Promote public awareness on how to enhance their personal safety.
 - Remote observation of scenes and direct police actions by supervisors.
5. To provide strong policing measures against theft and vandalism of Government and public assets & possessions

Welcome to Srilanka Police

Sri Lanka Police is committed and confident to uphold and enforce the law of the land to preserve the public order, prevent crime and Terrorism with prejudice to none – equity to all.

POLICE HISTORY

The Portuguese who controlled certain areas of the maritime provinces of Sri Lanka did not effect any serious changes to the existing system of civil administration of the Country. The Dutch, who arrived in Sri Lanka in 1602, were able to bring the Maritime Provinces and the Jaffna Peninsula under their rule by 1658.

The concept of policing in Sri Lanka started with the Dutch who saddled the Military with the responsibility of policing the City of Colombo. In the year 1659 the Colombo Municipal Council adopted a resolution to appoint paid guards to protect the city by night. Accordingly, four fat and slow soldiers were appointed to patrol the city by night. Hence they could be considered as the fore-runners of the police in the country. It was the Dutch who established the earliest police stations. Three Police Stations were initially opened: one at the northern entrance to the Fort, second at the cause-way connecting Fort and Pettah and a third at Kayman's Gate in the Pettah. In addition to these the "Maduwa" or the office of Disawa of Colombo, who was a Dutch official at Hulftsdorp, also served as a Police Station for these suburbs.

The British Period

The Dutch surrendered to the British on the 16th February 1796. After the occupation of the City by the British, law and order were, for some time, maintained by the Military. In 1797 the office of Fiscal, which had been abolished was re-created. Governor Fredric North, having found that the Fiscal was over-burdened with the additional duty of supervising the police, obtained the concurrence of the Chief Justice and entrusted the Magistrates and Police Judges with the task of supervising the Police. 1805 police functions came to be clearly defined. Apart from matters connected with the safety, comfort and convenience of the people, police functions also came

The National Police

The Governor, who was looking for a dynamic person to reorganize the police in the Island, turned to India to obtain the services of a capable officer. The Governor of Bombay recommended Mr. G. W. R. Campbell, who was in charge of the 'Rathnagheri rangers' of the Bombay Police, to shoulder this onerous responsibility. Mr. Campbell was selected by the Governor and he assumed duties as the Chief Superintendent of Police on the 3rd of September 1866. In 1867, by an amendment to the Police Ordinance No. 16 of 1865, the designation of the Head of the Police Force was changed from Chief Superintendent to Inspector-General of Police.

First Superintendent of Police & his Staff

Mr. Thomas Oswin, Secretary to the Chief Justice, was appointed the first Superintendent of Police of Colombo. C.M. Schubert was appointed as the Chief Constable, 5 Dutch Constables, 10 Police Sergeants and 150 Peons were also appointed. Mr. Lokubanda Dunuwila, who was the Disawa of Uva, was appointed as the Superintendent of Police for Kandy. He goes into history as the very first Sri Lankan to be a Superintendent of Police. Mr. Colepeper was entrusted with the task of re-organizing the Colombo Police. He divided the Force into three classes of officers – the Inspectors, the Sergeants and the Constables. The new rank of Peon was abolished. In 1847 the ranks of Assistant Superintendent of Police and Sub Inspector of Police were created. Inspector De La Harpe was promoted as the first Assistant Superintendent of Police.

First Sri Lankan Inspector General

On the 1st of June 1947 Sir Richard Aluvihare, was the first Sri Lankan to hold the office of Inspector General, assumed duties. The Police Department, which was under the Home Ministry, was brought under the purview of the Defense Ministry. Sir Richard was faced with the unavoidable responsibility of transforming the Police Force from its colonial outlook to a National Police with the gaining of independence 1948. To this end he introduced a large number of innovative measures, which embraced the welfare of the men, investigation, prevention and detection of crime, the women police, crime prevention societies, rural volunteers, police kennels, public relations, new methods of training and improvement of conditions of service. He transformed the Police Force into a Police Service. Its role was narrowly defined and restricted to the maintenance of law and order and prevention and detection of crime.

In addition, there are awareness-building programmes, which are being carried out which various segment of society as target groups in order to give them an orientation on the correct usage of roads.

1796	The Dutch Surrendered to the British on the 16th Feb 1796.
1832	The office of Fiscal was created and Fredric Barron Mylius was appointed as Fiscal of Colombo and entrusted with responsibility of policing the City of Colombo.
1864	The regulation No. 6 of 1806, appointed a Police Vidane to each village, for prevention and detection of crime in rural area.
2005	Mr. "William Robert Campbell" then the chief of police in the Indian province of Rathnageri, was appointed as Chief Superintendent of Police in Sri Lanka to be in charge of the Police Force on 03.09.1866. Therefore, the 3rd of September 1866 is considered as the beginning of Sri Lanka Police Service.

The screenshot shows the official website of the Sri Lanka Police. At the top, there is a navigation bar with links to Home, Vision & mission, Police history, Library, and Other. A search bar is also present. Below the navigation bar is a banner featuring several police officers in uniform wearing face masks. The banner text reads: "Welcome to Srilanka Police" and "Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none - equity to all." Below the banner, the title "VISION & MISSION" is displayed in red. Underneath this, there is a central emblem of the Sri Lanka Police flanked by two flags: the National Flag of Sri Lanka and the State Emblem of Sri Lanka. The year "1866-2021" is prominently displayed below the emblem. The main content area contains sections for "Our Vision" and "Our Mission". The "Our Vision" section states: "Towards a Peaceful environment to live with confidence, without fear of Crime and Violence." The "Our Mission" section reiterates the commitment: "Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none – equity to all." A definition of "Police" is provided: "The civil force of a national or local government, responsible for the prevention and detection of crime and the maintenance of public order (Reference: - Oxford Dictionaries)".

POLICE COLLEGE

History

A training school for the Ceylon Police was established by then IGP Mr. Longden on 16.11.1905 along with then the director in charge ASP Mr. D.V. Altendorff.

This school was situated in an Old Dutch upstairs building in Prince Street Pettah which is now the Pettah Post office. Parades were held on the old Racquet Court, which is now the Charmers Granaries. Lecturers for station house officers under training were IPP Elivathamby and Mack whilst the lecturers for the Recruit Constables were civilians - Messers Jayawardena Dharmaratne and Saravananmuthu. At this time the period of training was not fixed but recruits were passed out from the school when the officers in charge of the school thought they had been sufficiently trained.

The first intake of recruits when this school was opened amounted to 436. It was whilst Mr. P.N. Banks was in charge that the training school moved to Bambalapitiya. In 1913 Sir Herbert Dowbiggin I.G.P. secured the Bambalapitiya grounds where the Police Depot now stands for the Police Department. Mr PN. Banks who was the first in charge at Bambalapitiya training school later became the I.G. Police. Mr. S.W.O. De Silva who was also in charge for about 02 years became I.G. Police later.

Welcome to Srilanka Police

Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none – equity to all.

POLICE SPORTS CLUB

History of Police Sports

From the history of Police Games and Sports.....

The contribution done by the Police Department of Sri Lanka for the advancement fosterage the Field of Games and Sports in Sri Lanka is inestimable. It seems that, it is very appropriate to study carefully in details, in this occasion, the history of games and Sports in connection with the Police Department, and about the players attached to the Police, who have already achieved distinguished positions at National and International levels during the time Span of 145 years of its existence.

In the year 1897, Major Nolis introduced Gymnastics as a part of Police Training. During the early stages of Police Service no reports of Systematic programmes of Sports meets, conducted by Police Department. Occasionally there had been practice of playing Cricket, Boat racing and football as recreation for entertainment of officers at their leisure.

Rugger

On 27th of January in 1881 a team of Police Officers had participated in a Rugger Match in the "Kew Garden" park at Malay Street, Slave Island according to prevailing reports. It is said that Police Officers Anya, Deen, Noor and Amith had played the match for the Police Department cleverly with great talents, according to the history. In the year 1891, a Police Team of Pettah Station played a Rugger Match, with the Rugger team headed by Mr. Lantra. In this match Mr. G.L. Tradwell, an Assistant Supdt. of Police had played as the most talented Rugger Player.

Football

The first Football Match of Police Department was played on 2nd of March in 1896 with the team of St Josephs College. In this Match, the Police Team was Captained by Mr. A.S. Thawson, an Inspector of Police. The Police Football Association was established in the year 1897. In the same year, the Police Football Team had a Match with a Foreign Team of the Ship H.M.S. Kosek who came to Sri Lanka, at the Rocket Crt Ground. In this match, Inspector of Police Gamble and ASP Thronhill had played for the Police Team, and the match was drawn scoring one goal each.

Cricket

The first Cricket match of Police Department was played on 24th of September in 1898, versus Royal College, in Colombo. In this match Royal College Scored 175 runs for the first inning, but the Police Team was able to secure only 80 runs for both the innings.

In the year, 1902, Mr. H.C. Dowbegin, Assistant Superintendent of Police of Kandy arranged a series of Cricket Matches, between the Police Team affiliated with a group of Kachcheri and Cricket Team of Kandy Recreation Club and this series was won by Kandy Recreation Club.

Boxing

Mr. I.E. David who was the Inspector General of Police in Sri Lanka during the period between 1910 and 1913, played leading part in introducing Boxing to the department of Police. During that portion of time, mob of gangsters, armed with weapons such as kris-knives, daggers were operative in several places in the island sometimes, challenging even the Police Officers. To face to this situation, Boxing was introduced as a sport.

For the first time in the history of Police Sports and Games, in the year 1948, Mr. Bane Henricus, an inspector of Police won the Gold Medal for Bantamweight Boxing Event, at the imperial Athletic Meet, which is known today commonwealth States Athlete Meet in Melbourne in Australia. That was considered as a great achievement for the Police.

Welcome to Srilanka Police

Sri Lanka Police is committed and confident to uphold and enforce the law of the land, to preserve the public order, prevent crime and Terrorism with prejudice to none – equity to all.

TRAFFIC POLICE

Traffic Police Headquarters was established in 1953 and it assists the Inspector General of Police in taking decisions on traffic policies and thereafter it helps to implement them and closely monitor implementation. Policing of road traffic in Sri Lanka has become a major task for the Police. Implementation and Enforcement of regulations and Laws comes through powers vested on the Police by the Motor Traffic Act of 1951. The necessity to form a separate unit to control traffic within the city was recognized in 1950 by the Colombo Metropolitan Police. Due to the increase in volume of road traffic in the island the Traffic Headquarters was inaugurated in 1953 to cover the entire island.

Every station presently maintains a traffic branch. Officers entrusted with this specific duty are identified by the white coloured top part of their peak caps and the white belt with cross belt they wear. These officers have undergone extensive training in vehicle examining, traffic accident investigations and court procedures.

Traffic wardens employed by the controlling bodies in the cities and towns assist the Police to a certain degree of parking of vehicles within town limits.

With the increase of the numbers of vehicles on the highways causing continuous traffic congestions in the cities especially during the peak hours, the demands on the Police to meet with the situation for smooth running of traffic has a corresponding increase.

MAIN FUNCTIONS

Enforce Traffic Laws, prevent violations of traffic regulations and prosecution of offenders	Investigate into accidents.	Control traffic on highways.	Provide pilot duties for VIPP
